

## Chemistry | 2013-2014 Assessment Plan

1. Which outcome will you assess?

#13 Have the ability to design experiments to collect information on a specific chemical problem or process

2. Which technique will you use to assess this outcome?

We will use imbedded assessment.

3. Which course or group of students will you assess on the outcome chosen above and when?

In chem 413, Instrumental Analysis, students design and perform a study to generate information about a specific chemical question then analyze, interpret and present their results. The report on this project will be evaluated to assess this learning outcome.
