Computer Science| 2014-2015 Assessment Plan

1. Which outcome will you assess?

   Each instructor in the program will target one or more of the program's learning outcomes that is appropriate for their courses, will decide on an assessment method and will report the grading of student work in the course linked to that target learning outcome.

2. Which technique will you use to assess this outcome?

   We will use a combination of embedded assessment methods applied to the collection of papers, projects, tests and other performance measures.

3. Which course or group of students will you assess on the outcome chosen above and when?

   All courses offered in the program this academic year will be assessed.

4. Who will do the assessment and coordinate the data collection and reporting?

   Individual faculty members will conduct the assessment and report results to the program chair, Professor Peter Breznay.
