

## ACADEMIC PROGRAM REVIEW SELF-STUDY REPORT

**Name of Program:** Public and Environmental Affairs--majors in Environmental Policy and Planning and Public Administration

**Department Chair:** John R. Stoll

**Date Report Completed:** Spring 2015

**Date of Last Program Review:** 2006-07

**Date Report Completed:** April 2015

**Preliminary Remarks:** At the present time ...

APR 21 2015

Office of the  
Dean of Liberal Arts and Sciences

### Section A. Mission Statement and Program Description.

State your program's mission, describe its requirements and explain how they relate to UW-Green Bay's select mission and the institution's overall strategic plan. Note any changes that have been made to your program mission and requirements since the last review. Then provide a description of your program's curricular strengths and areas in need of improvement.

*Note: As we did with our last review, both here and throughout the document, we will include material on each of the two majors sponsored by PEA: Public Administration and Environmental Policy and Planning. Although there are separate curricula, learning outcomes, achievements, and needs in each, they are offered by the same PEA faculty. Any changes in departmental resources will have an impact on both interdisciplinary majors.*

*Further, as perspective on our budgetary unit, the PEA department faculty is highly involved in the Economics and Political Science disciplinary majors, along with minors in Geography, Global Studies, and Sociology. There is one anthropologist, an instructor appointment in the PEA department, supporting courses in this area as well as First Year seminars for the general education curriculum. The majority of our faculty also serves on one or both of the graduate faculties for the MS in Environmental Science and Policy and the MS in Sustainable Management.*

**1. Public Administration Mission Statement:** Public Administration is an interdisciplinary program that studies public and nonprofit organizations; their rules, functioning, decisionmaking processes, and outputs in various policy arenas; their managerial and leadership styles; and the social, economic, political, and cultural processes within which these organizations interact. The curriculum is much broader than the traditional public administration major. In particular, it covers public policy processes and politics substantially more. The core mission of the program is to educate students to become knowledgeable and to think critically about public affairs and to prepare them to participate both as community leaders and professionals in public and nonprofit organizations.

The Public Administration program is the only undergraduate major in this area within the UW-System. We have made efforts, and will continue, to gain approval for development of a Masters in Public Administration from UW-System and believe we are better suited for doing so than other campuses given our long undergraduate program history. We are also unique in our attention to environmental issues and nonprofit management, areas upon which we would seek to specialize and gain national accreditation.

As our mission above indicates, the major and minor in Public Administration are ideally suited to the University's distinctive interdisciplinary academic plan. The problem focus of the program is exemplified by a curriculum designed to provide students with a strong background in political, governmental, economic, and social institutions and processes, and the communication and analytical skills to address administrative and organizational problems required by management and to evaluate complex issues of public policy in areas such as environmental protection, health care, and transportation.

The program is fully consistent with the University's guiding principles. Those principles stress the building of student capacity for critical thinking, problem solving, communication, and use of quantitative analysis as well as preparing them as engaged and contributing citizens who are committed to lifelong

learning. The program is also designed to be flexible and responsive to student, community, and regional needs, and its faculty is committed to excellence in education and scholarship, seeking to maintain national prominence as a distinctive program. In addition, PEA faculty members are strongly devoted to community outreach, professional service, and graduate education.

**2. Environmental Policy and Planning Mission Statement.** Environmental Policy and Planning (EPP) is an interdisciplinary program that provides a solid curriculum in public policy and planning aspects of environmental studies. The major includes a strong component in environmental and other natural sciences. The EPP major, also unique in being the only such program in the UW System, provides students with a problem-focused and rigorous liberal arts education that also prepares them for a variety of challenging professions in environmental planning, Geographic Information Systems (GIS) work, environmental policy analysis, and administration of policies and programs dealing with the natural and human-made environment. The major also prepares students well for graduate studies in environmental policy, law, and planning.

As with Public Administration, the major and minor in Environmental Policy and Planning are ideally suited to the University's distinctive interdisciplinary academic plan. The problem focus of the program is exemplified by a curriculum in the major which is designed to provide students with a strong background in environmental and other natural sciences, economics, government and politics, planning, and public policy, and the communication, research, and analytical skills to address contemporary environmental problems. The program's formal course work, team-based projects, applied assignments, and internships provide students with excellent preparation to enter the workforce, graduate school, or professional studies.

The program is consistent with the University's guiding principles, as noted above for the PA major. Those principles stress the building of student capacity for critical thinking, problem solving, communication, and use of quantitative analysis as well as preparing them as engaged and contributing citizens who are committed to lifelong learning. The program is designed to be flexible and responsive to student, community, and regional needs, and its faculty is committed to excellence in education and scholarship and to seeking national prominence. As noted for the PA major, PEA faculty members are strongly devoted to community outreach, professional service, and graduate education.

### ***Program Curriculum..***

The basic curriculum for each of the two majors is set out in the 2014-15 Undergraduate Catalog. We continue to have the student organization, Public and Environmental Affairs Council (PEAC), represent students in the two programs.

Although the catalog descriptions for both majors are current, the new 2015-16 catalog will contain substantial changes as a result of the issues identified below. We hold annual day-long retreats and bi-weekly faculty meetings throughout the year at which curricular and others issues are continually discussed and evaluated. Faculty in the PEA budgetary unit participate in teaching improvement activities throughout the year, including peer mentoring, Faculty College, the Winterterm campus teaching workshop, online education training, and the Teaching Scholars programs. They have also been the recipient of campus and UW-System teaching awards.

**Internship Program.** The internship within PEA is integrated into both the PA and EPP majors. We administer the program through a departmental internship coordinator who receives a one-course reassignment from teaching and our Center for Public Affairs Associate Director, administering a Great Lakes Higher Education Corporation internship grant. In recent years we have had in excess of 50 interns per year. They are placed in a diverse array of positions within local and state government agencies, tribal governments, nonprofit organizations, and, more rarely, the private sector. Most internships are taken for 3 credits, with some occasionally for 6 credits. We screen the interns carefully before placement, and all must go through the departmental internship coordinators for advising and registration. This process helps to ensure that only qualified students are placed in an internship, which in turn helps to build a successful program. Our Web site (<http://www.uwgb.edu/pea>) includes a description of the

internship program as well as a list of previous internships and illustrations of how the program has served selected students.

We evaluate the internship program every year, and off-campus supervisors consistently report they are highly pleased with our student placements. So too are the students, many of whom find the experience to be a highlight of their major in PA or EPP. Internships provide students with a good opportunity to learn what a planner, manager, analyst or other professional actually does, and many make their career decisions based on this experience.

### 1. Public Administration:

Since the last program review, the major has undergone change in several iterations. Rather than recite history, below are indicated the findings of a subcommittee of our faculty who met and identified concerns and made recommendations to the faculty. After review, the subcommittee identified several concerns that could be addressed through making simple modifications to the major.

Strengths of the program were recognized as:

1. The numbers of majors are growing
2. Internship program (grant)
3. Research scholars CFPAs
4. Collaborations with other units

The following areas of concern were identified:

1. The major offered too many elective options and could be tightened up and simplified.
2. Due to the growing overlap in functions of government and nonprofit organizations, there was no longer a need to have two areas of emphasis (public management and nonprofit management).
3. A course in Human Resources was needed, possibly replacing the course in Leadership.
4. A stronger course sequencing through the major could be offered, especially planning for students entering the major coming into lower level supporting courses. It seems as though there is a gap in course options for students coming out of 101 and 202, with only a fall option for a face to face course in 215, the next likely course in the sequence. While 215 is offered online in the spring with an adjunct faculty, this configuration does not facilitate students entering the PA major.
5. The Emergency Management Emphasis

The following goals were suggested for the PA major:

1. Re-focus the curriculum.
  - Streamline and focus the elective options under both the public and nonprofit management elective sections. Reduce the number of electives under public management by eliminating some courses that focus on areas more peripheral to public service. Add some business courses as elective options under the nonprofit elective options.
  - Eliminate the two areas of emphasis and offer one PA major that requires students to take courses from both the public and nonprofit management areas.
  - Add Human Resources course as a requirement. This course is required for Public Administration certification and also for nonprofit management national certification. This course would replace Leadership in Organizations, which has proven a challenge to staff, and may not be a central course for the major. Coverage of leadership could possibly be augmented within several existing courses or as a capstone course that includes ethics.
2. Recruit more majors.
  - Improve the course opportunities to move students from lower level courses into the major. Augment the Spring online PUEANF215 section of Public Administration with one face-to-face section and have Dr. Warner teach a section of that course. This would provide students with two face-to-face options for 215, with Dr. Helpap continuing to teach the course with emphasis on government, and Dr. Warner with emphasis on nonprofit. Ask Adult Degree to only offer section 1200 of PEA or have section 1800 restricted to 5 openings as a maximum.
  - Continue to develop collaborative relationships with other majors on campus whose students tend to enter jobs in the public or nonprofit management field, attracting them into the PA minor and NP management certificate.
  - Improve visibility of PA major on campus.

These were discussed at faculty meetings in the current academic year, programmatic changes submitted through the approval process, and have been approved for Fall 2015 implementation. The final revised curriculum for the PA degree has removed the emphases, developed two transcriptable certificates to replace them, and added a new course in "Public and Nonprofit Human Resources and Risk Management". We are also beginning to work with the ADP Office to bring our undergraduate degree online.

## 2. Environmental Policy and Planning.

Since the last program review, this major has also undergone change in several iterations. Below are indicated the findings of a different faculty subcommittee that met and identified concerns. Their recommendations were made to the faculty this academic year. The subcommittee's findings are summarized below.

Strengths of the EPP's Environmental Planning emphasis were recognized as:

1. Applied component to courses
2. Diversity of faculty and scholarship with research and teaching interests
3. We are preparing students well to deal with contemporary environmental issues such as climate change and sustainability through coursework, department efforts such as the iPat movie/discussion series, TED Talks, and internship opportunities.

The following areas of concern for the Environmental Planning emphasis were identified:

1. Consider requiring an internship, field, work, GIS, etc. to better prepare students entering the work force or for graduate school.
2. Reduce the number of electives in the areas of emphasis to preserve core EPP classes and help with low course enrollments. Public and nonprofit and strategic philanthropy were discussed as options.
3. Reevaluate periodicity of courses, particularly whether we are offering more courses in the fall or on a 3-3 teaching load.
4. Improve communication to students to help understand potential job opportunities in the area related to planning. We discussed the growing pressures on students to pick a major quickly and get a job and discussed how well we are informing students about planning/EPP jobs.
5. Use the word "applied" in more of the department messaging and continue building in applied components to courses such as community presentations, campaigns, or simulations.

The following goals were suggested for the EPP major's Environmental Planning emphasis:

1. First Year Seminars.
  - Can we look at offering FYS that relate more closely to the major as a way to create a natural feed of students into EPP? Animals and the ever-changing environment (planning) and Animals and Society (sustainability) were examples given.
  - Can we offer a planning FYS?
  - Improve the consistency of FYS offerings to offer a planning/EPP FYS on a regular basis and possibly build this into a teaching rotation.
2. Special topics courses
  - Have we offered one of these in the last two years? With a decline in majors, there is the need to justify enough people for a class to run.
  - Is there potential to have additional January interims or summer classes that are special topics?
3. Cross-listed courses
  - Are we getting benefits of students in the major taking the cross-listed course? For example, are students taking cross-listed courses who are not majoring and hurting enrollment numbers in classes directly related to the major?

Strengths of the EPP's Environmental Policy emphasis were recognized as:

1. Highly responsive and accessible faculty who assist with advising, independent studies and research projects, teaching assistantships, and maintain strong connections with students.
2. New media and modern technology are being incorporated in the classroom, particularly with the GIS courses.

3. Community engagement efforts: iPat series, field trips, interviews with community public service leaders, research projects, invited guest speakers, New Leaf Market and University Avenue Redevelopment Connections, faculty participation in community speaker series (NAS, Dean's Lecture), Admissions events
4. Graduate advising: participation on theses, committee work, course offerings, advising for continuing undergraduate students pursuing a graduate degree at UWGB

The following areas of concern for the Environmental Policy emphasis were identified:

1. Reevaluate course periodicity and offerings. Similar concerns as planning with course rotation and periodicity.

The following goals were suggested for the EPP major's Environmental Policy emphasis:

1. Explore development of a GIS certificate program and the need for at least two additional GIS courses.

### **Section B. Student Learning Outcomes Assessment.**

*Describe the program's intended student learning outcomes and the methods used to assess them. Analyze the assessment results and describe the conclusions drawn from that analysis. Finally, describe what specific actions were taken as a result of the assessment of student outcomes learning.*

The assessment methods that we employ are similar for the two majors. They have not been consistently used but include (1) a survey of all senior PA and EPP majors during their last semester; (2) an embedded assessment that has taken place within each of the upper-level core courses within each major; and (3) an analysis of internship evaluations for all PA and EPP majors completing an internship. The embedded assessments were conducted in the three core course, generally once a year. For the PA major these are Public Policy Analysis 408, Public and Nonprofit Management 315, Evaluating Programs in Public/Nonprofit Organizations and Public/Nonprofit Budgeting 415. For the EPP major these were Environmental Politics and Policy, Environmental Law, and Environmental Planning. As the units newly approved capstone, Seminar in Ethics and Public Action, for PA and EPP majors becomes institutionalized in the program, it will be subject to development of a stronger assessment plan for our majors.

Issues raised by faculty during this self-assessment process are listed below and will become part of our future activities in improving assessment.

1. General:
  - Available assessment measures and statistics provided do not capture double majors.
  - Statistics from Graduating Senior Survey
    - We need to improve our score for the time courses were offered. (3.0 =B)
    - While UWGB scores higher on in-class student-faculty interaction, EPP is lower than the campus average. This is an area to improve, but may also be the result of faculty changes in the last three years.
2. Methods of assessment
  - Consider giving a pre and post-test in future Environment and Society or other core classes for the major.
3. Peer classroom observations of PEA colleagues in addition to improved communication among the department regarding syllabi and connections between courses.
4. Capstone project: We discussed having a final project, pre and post test with answers remaining confidential until grades were submitted, evaluate the projected based on learning outcomes and build in qualitative measures to the course in addition to quantitative ones.
5. Look into other universities' methods of assessment.
6. Discuss our unit learning outcomes in relation to a tighter fit with an assessment plan for the future.

### ***Student Learning Outcomes by Academic Program.***

<b>Learning Outcome #1. PA Major:</b> Have the skills necessary to be an engaged citizen (PU EN AF 426).
<b>Learning Outcome #2. PA Major:</b> Demonstrate knowledge of American government institutions and political processes (POL SCI-101, 316, 410; PU EN AF-202, 215, 301, 306, 314, 408, 406).
<b>Learning Outcome #3. PA Major:</b> Express knowledge of the concepts, principles, and theories in public administration (PU EN AF-215, 315, 408, 415).
<b>Learning Outcome #4. PA Major:</b> Engage in ethical decision-making and critical thinking in public administration (PU EN AF 430).
<b>Learning Outcome #5. PA Major:</b> Communicate clearly and effectively within the field of public administration (all courses).
<b>Learning Outcome #6. PA Major:</b> Locate, analyze and create research reports in the field of public administration (PU EN AF-202, 215, 315, 408, among others).
<b>Learning Outcome #7 for the PA Major:</b> Qualify for graduate work in schools of public or nonprofit administration, public affairs, planning, policy, or related fields, or qualify for entry level professional employment in government and nonprofit organizations (all courses).

<b>Learning Outcome #1. EPP Major:</b> Exhibit an understanding and ability to implement sustainability as an engaged citizen (PU EN AF 102, 323, 324)
<b>Learning Outcome #2. EPP Major:</b> Demonstrate basic knowledge of environmental science and selected other areas of natural science (ENV SCI-102 and both lower- and upper-level environmental science, biology, geography, and geology courses).
<b>Learning Outcome #3. EPP Major:</b> Express knowledge of the concepts, principles, and theories of environmental policy, law, and planning (PU EN AF-202, 408, 301, 322, 350, and 378).
<b>Learning Outcome #4. EPP Major:</b> Engage in ethical decision making and critical thinking in environmental policy and planning (PU EN AF 430).
<b>Learning Outcome #5. EPP Major:</b> Communicate clearly and effectively about environmental policy and planning (all courses).
<b>Learning Outcome #6. EPP Major:</b> Use technical skills in environmental policy and planning (PU EN AF-301, 378, 322, and other upper-level courses).
<b>Learning Outcome #7. EPP Major:</b> Qualify for graduate work in schools of environmental studies, public policy, public affairs, planning, or related fields, or to qualify for entry level professional employment in environmental policy and planning (all courses).

### Section C. Program Accomplishments and Student Successes.

Describe your program's major accomplishments since the last Academic Program Review (e.g., internship program; enrollment increases; student achievement, awards, publications, and presentations; faculty scholarly activity; graduate school admission; diversification of students and faculty; program and faculty awards). Also describe faculty and staff professional development activities and how they impacted your program.

Students in the programs of the PEA department have been active in campus activities, engaged in internships, involved in their local community through civic engagement activities, typically employed upon graduation, and successful in graduate schools. The faculty are highly productive and students are engaged with them as evidenced by participation in the Phi Kappa Phi student research forum, Posters in the Rotunda, and presentations at professional conferences.

#### **Section D. Program Enrollment Trends and Analysis.**

Provide an analysis of the data (both survey and institutional enrollment data) provided by the Office of Institutional Research and Assessment. Pay close attention to the demographic information. What trends are present? Are there any imbalances in terms of gender, race, or ethnicity? Describe what specific actions, if any, were taken or are intended to be taken based on the conclusions drawn from the analysis.

Enrollment trends are a concern but not surprising. There has been a decrease in majors for the EPP degree with an increase in the PA major. Overtime these two majors have tended to cycle in opposite directions. More importantly in relation to these changes, the faculty retirements within the EPP program over the past 3-4 years have been most heavily involved with the environmental policy area of study. While they have been replaced with junior faculty, this has been a transition time. Recently, one of those junior replacements has also chosen to cease being a faculty member and, given current budget scenarios, is likely to be a loss to the program that will further exacerbate the trends for the short term in the EPP program.

As pertains demographic changes, the enrollment of females has trended to be more dominant, as has the campus in general. Faculty composition is more than 50% female and may also play a role in this occurrence. Although we have no evidence that this has affected program quality.

Since the prior review in 2006, the department has become much more active in offering online courses and has strove to maintain a balance that enables students to make a choice of which delivery mode they prefer. As a unit, PEA has chosen to ensure that students have an array of offerings and delivery modes that enable them to choose not only courses but method of delivery, without being forced to take an online class due to lack of alternatives.

#### **Section E. Program's Vision for Future Development.**

Describe your program's plan for future development including the program's major goals for the next seven-year period. These goals should be established with the understanding that they will be used to guide program planning and development and serve as a framework for your program's next Self-Study Report.

At the present time, the Urban and Regional Studies major and budgetary unit is being asked to reconsider its programs and existence. We have been informed by the Dean that he would like our budgetary unit to work with the URS budgetary unit and consider how to consolidate our programs and structures. This communication has been shared with higher administration and is expected to result in changes that will proceed through governance bodies in the coming fall as an informational item. Much of our immediate future will be directed at implementation of this change over the coming year. At present we expect (but are not certain) there will be three degrees under our budgetary unit. The discussion below is directed only at our two existing degrees that have recently undergone approved change. The items here are expected subsequent directions and actions.

The following goals are suggested to the PA major:

1. Re-focus the curriculum.
  - a. Streamline and focus the elective options under both the public and nonprofit management elective sections. Reduce the number of electives under public management by eliminating some courses that focus on areas more peripheral to public service. Add some business courses as elective options under the nonprofit elective options.
  - b. Eliminate the two areas of emphasis and offer one PA major that requires students to take courses from both the public and nonprofit management areas.
  - c. Add Human Resources course as a requirement. This course is required for Public Administration certification and also for nonprofit management national certification. This course would replace Leadership in Organizations, which has proven a challenge to staff, and may not be a central course for the major. Coverage of leadership could possibly be augmented within several existing courses or as a capstone course that includes ethics.
2. Recruit more majors.
  - a. Improve the course opportunities to move students from lower level courses into the major. Augment the Spring online PUEANF215 section of Public Administration with one face-to-

- face section and have Dr. Warner teach a section of that course. This would provide students with two face-to-face options for 215, with Dr. Helpap continuing to teach the course with emphasis on government, and Dr. Warner with emphasis on nonprofit. Ask Adult Degree to only offer section 1200 of PEA or have section 1800 restricted to 5 openings as a maximum.
- b. Continue to develop collaborative relationships with other majors on campus whose students tend to enter jobs in the public or nonprofit management field, attracting them into the PA minor and NP management certificate.
  - c. Improve visibility of PA major on campus.
3. Develop Emergency Management from a Certificate into a Major. This is a growing career field and is naturally aligned with PEA. Add a new faculty line.
  4. Develop the area of Public Administration in global civil society (Katia – our potential new search process in Political Science might provide an opportunity to contribute to internationalizing our PA major).
  5. Investigate options to offer an online program in PA (John)
  6. Strengthen job placement network for PA students.
    - a. Linked in network with alumni and recent grads (team with Alumni program)
    - b. Find a way for community partners to learn about our program (project with Career services?)

The following goals are suggested to the EPP major:

1. Develop our opportunities in the area of planning, i.e., climate change planning, which is another growing area.
2. Refocus curriculum considering how we sequence courses to engage students into the EPP major.
3. Explore development of a GIS certificate program and the need for at least two additional GIS courses.

#### **Section F. Summary and Concluding Statement.**

Describe your program's plan for future development including the program's major goals for the next seven-year period. These goals should be established with the understanding that they will be used to guide program planning and development and serve as a framework for your program's next Self-Study Report.

It is anticipated that the next few years will be challenging ones. As resources are tight, development of new programs and maintenance of quality in existing degrees will be an issue to be confronted. At present we feel we have been responsive to changing needs and that our programs have been continually evaluated and evolved in response. We will be proactive to the extent that we are enabled to so do. Our efforts to mount some new programs have been frustrating administratively (e.g., seeking an entitlement to plan a Masters in Public Administration, developing a graduate certificate in Emergency Management), but the interest still exists.

Declining enrollment is the largest issue facing us in the short term and we have been making an effort to address this through involvement with campus recruitment, preview days, focus program, and engagement of students in research and internships. A looming concern, is that salary structures and budgets will lead to the loss of personnel that are critical to maintenance of quality programs. The third issue that is a concern to all is the upcoming absorption of the Urban and Regional Studies budgetary unit and its programs; all want to ensure that this is done in a manner that is comfortable and leads to an improved set of programs and faculty morale.

**Section E. Required Attachments.**

Four attachments (and only these four) should be included with the Self-Study Report:

1. A series of tables, prepared by the Office of Institutional Research and Assessment. A list of these tables is included in Appendix C;
2. The program's current official description and requirements as published in the most recent Undergraduate Catalog;
3. The Academic Affairs Council and Dean's conclusions and recommendations from the program's last review; and
4. The program's Assessment Plan and Annual Updates on Student Outcomes Assessment (see the descriptions below). These processes will be coordinated by the University Assessment Council, the UAC's Academic Program Assessment Subcommittee and are described in the University Assessment Plan.

Appendix A  
DATA TABLES  
Environmental Policy and Planning

## Program Review Five-year Summary Files

Data Files can be found here for each major:

<http://www.uwgb.edu/oira/reports/ProgramReviewFiles/>

**Alumni Survey: 2009, 2010, 2011, 2012 & 2013**

	<b>Survey year</b>	<b>Graduation Year</b>	<b>Env Pol &amp; Plng</b>	<b>UWGB Overall</b>
<b>Graduates:</b>	2009	2005-2006	16	1087
	2010	2006-2007	19	1148
	2011	2007-2008	20	1162
	2012	2008-2009	19	1133
	2013	2009-2010	24	1295
<b>Response Rate*</b>	2009-2013		7/98 (7%)	882/5825 (15%)

\* Note: % response misses double-majors who chose to report on their other major.

**Table 1. Preparation & Importance**  
 ■ Preparation by UWGB (5-pt. scale; 5 = excellent)  
 ■ Importance to current job or graduate program (5-pt. scale; 5 = very important)

	Unit of Analysis	2009-2013					
		Preparation			Importance		
		n	Excellent or Good	Mean	n	Very important or Important	Mean
Critical analysis skills.	EPP	1	100%	4.0	1	100%	4.0
	UWGB	702	67%	3.8	684	91%	4.5
Problem-solving skills.	EPP	1	100%	4.0	1	100%	5.0
	UWGB	704	69%	3.8	679	94%	4.7
Understanding biology and the physical sciences.	EPP	1	100%	5.0	1	100%	5.0
	UWGB	672	46%	3.4	671	30%	2.6
Understanding the impact of science and technology.	EPP	1	100%	5.0	1	100%	5.0
	UWGB	670	47%	3.4	675	43%	3.2
Understanding social, political, geographic, and economic structures.	EPP	1	0	3.0	1	0	1.0
	UWGB	689	60%	3.7	676	57%	3.5
Understanding the impact of social institutions and values.	EPP	1	100%	4.0	1	0	2.0
	UWGB	692	68%	3.9	676	63%	3.7
Understanding the significance of major events in Western civilization.	EPP	1	0	3.0	1	0	1.0
	UWGB	682	53%	3.5	673	28%	2.6
Understanding a range of literature.	EPP	1	0	2.0	1	0	1.0
	UWGB	678	50%	3.5	669	32%	2.7
Understanding the role of the humanities in identifying and clarifying individual and social values.	EPP	1	0	3.0	1	0	2.0
	UWGB	676	57%	3.6	663	39%	3.0
Understanding at least one Fine Art, including its nature and function(s).	EPP	1	0	2.0	1	0	1.0
	UWGB	682	60%	3.7	667	25%	2.5
Understanding contemporary global issues.	EPP	1	100%	4.0	1	0	2.0
	UWGB	680	54%	3.6	665	52%	3.4
Understanding the causes and effects of stereotyping and racism.	EPP	1	100%	4.0	1	0	1.0
	UWGB	682	63%	3.8	668	56%	3.5
Written communication skills.	EPP	1	100%	5.0	1	100%	5.0
	UWGB	694	80%	4.1	672	92%	4.7
Public speaking and presentation skills.	EPP	1	0	3.0	1	0	3.0
	UWGB	690	60%	3.7	676	85%	4.4
Reading skills.	EPP	1	100%	5.0	1	100%	4.0
	UWGB	689	73%	4.0	670	91%	4.6
Listening skills.	EPP	1	100%	5.0	1	100%	5.0
	UWGB	689	74%	4.0	672	96%	4.8
Leadership and management skills.	EPP	1	100%	4.0	1	100%	5.0
	UWGB	691	65%	3.8	668	94%	4.7

**Table 2. Educational experiences**  
(5-pt. scale; 5 = strongly agree)

	Unit of Analysis	N	Strongly Agree or Agree	Mean
My educational experiences at UW-Green Bay helped me to learn or reinforced my belief that learning is a lifelong process.	EPP	7	86%	4.1
	UWGB	877	93%	4.4
While at UW-Green Bay, I had frequent interactions with people from different countries or cultural backgrounds than my own.	EPP	7	14%	3.1
	UWGB	870	51%	3.4
Students at UW-Green Bay are encouraged to become involved in community affairs.	EPP	7	43%	3.4
	UWGB	866	59%	3.6
My experiences and course work at UW-Green Bay encouraged me to think creatively and innovatively.	EPP	7	86%	4.0
	UWGB	877	87%	4.1
The interdisciplinary, problem-focused education provided by UW-Green Bay gives its graduates an advantage when they are seeking employment or applying to graduate school.	EPP	7	57%	3.6
	UWGB	870	78%	4.0
UW-Green Bay provides a strong, interdisciplinary, problem-focused education.	EPP	7	43%	3.4
	UWGB	877	83%	4.1
Students at UW-Green Bay have many opportunities in their classes to apply their learning to real situations.	EPP	7	29%	3.3
	UWGB	872	73%	3.9
I would recommend UW-Green Bay to co-worker, friend, or family member.	EPP	7	57%	3.9
	UWGB	879	90%	4.4
The General Education requirements at UWGB were a valuable component of my education.	EPP	6	67%	3.7
	UWGB	840	58%	3.5
UWGB cares about its graduates.	EPP	7	71%	3.7
	UWGB	846	61%	3.7
I feel connected to UWGB.	EPP	7	29%	3.4
	UWGB	866	45%	3.3
