Are appointment summary reposts and notes part of a student's official record and subject to restrictions under the Family Educational Rights and Privacy Act (FERPA) and local privacy laws?

- Yes! Any information you enter into the Navigate platform pertaining to a student becomes part of their official student record and may be subpoenaed by that student, as outlined in FERPA. Please consult with the Application Administrator for institution-specific guidelines about what information to include (and not include) in the summary reports and notes.

If I mark a note as private, who can view that note?

- A note marked as private is not visible to anyone in the platform other than you. However, it is still part of the student's official educational record and, therefore, included within any student requests for their records. Please be mindful of the information you include within your private notes.
