Student Government has elected to purchase a bike shelter and rack structure for campus. This structure will be placed on state property within the academic buildings. Two locations have been selected based on visibility, available land, grade, and environmental impact. Please select between the following two options, which are near to each other.

A. Gateway to the Arb, The location where the Arb begins which is centered along MAC, with the Kress directly to the left and the Instructional Services Roof directly to your right, and MAC behind you. The Cofrin Library is behind you to your right, and environmental sciences is across the prairie to your right. The Kress Center Parking Lot is directly in front of you across from the prairie.

B. MAC Hall East entrance, where MAC, the Kress, and the Mauthe Center form a triangle. The shelter would be directly next to the MAC Entrance on the right hand side of the walkway that leads up to the MAC entrance.
