Using ArcGIS 10.1 with Mastering ArcGIS 5th edition

This document is provided as assistance for instructors who have upgraded to ArcGIS 10.1 but must continue using the fifth edition of Mastering ArcGIS until the sixth edition is available. For each chapter, it lists known differences and bugs encountered during preparation for the 6th edition of the book. Hopefully as service packs become available, the bugs will go away.

Overall, the differences between Version 10 and Version 10.1, for the purpose of the material covered in Mastering ArcGIS, are minor, and instructors can anticipate that their courses will go smoothly with the help of this document. Chapter 15 is the only possible exception, as the changes to the tutorial steps are numerous.
