

Sustainable Development

*Design Guidelines for the
Town of Scott - City of Green Bay
Joint Planning Area*

*Environmental Science and Policy 763
University of Wisconsin - Green Bay
Fall 2004*

Acknowledgements

The members of the Environmental Science and Policy Capstone Class would like to extend deep appreciation to Dr. Patricia Terry and Dr. Laurel Phoenix for their leadership, professional insight, and time spent during and outside of class in helping us to focus our research and prepare this presentation.

Special thanks are also warranted to Dan Madigan for allowing us the unique opportunity to be an integral part of the development process.

The class would also like to acknowledge the participants of the brainstorming session which was held on October 12, 2004. All of the guests helped us to begin the sometimes difficult process of selecting areas of study and examining items that the community holds as important aspects.

Participants of the Brainstorming Session:

Bill Lockery, Green Bay Planning
Dave Cerny, Town of Scott
Bill Hafs, Brown County Land
Conservation Department
Ray Kopish and Paul Jadin, Chamber of
Commerce
Paul Wozniak, Wisconsin Public Service
Paul Hartman, University of Wisconsin
Extension
Community Members in Attendance

Furthermore, the presentation could not have been completed without the assistance of many various individuals and agencies who helped us to generate ideas, who completed interviews and opinion polls, or who directed us to additional sources with more complete information. We are grateful for their willingness to lend a hand:

Bruce Shepard, UWGB Chancellor
Dean Rodeheaver, UWGB Assistant
Chancellor for Planning and Budget
Joel Trick, United States Fish and Wildlife
Service
Jeff Dumez, Brown County Land
Information Office
Bill Hafs, Brown County Land
Conservation Department
Pat Robinson, Wisconsin Department of
Natural Resources
Bay-Lake Regional Planning Commission
Professor Gary Fewless, UWGB
Herbarium Curator
Professor Bob Howe, Director of the
UWGB Cofrin Center for Biodiversity
Professor John Katers, UWGB
Students at the University of Wisconsin
Green Bay

In closing, thank you to all involved. If any names have been omitted, it is not because they or the information provided was unimportant; instead, it is a mistake on our behalf which is not intentional.
