Professional Program in Nursing

Presenters

Diane J. Skiba, PhD, FAAN, FACMI
Professor of Health Care Informatics,
University of Colorado in Denver and the
author of “Emerging Technologies.”
Dr. Skiba has taught nursing informatics
for the past 29 years and is a columnist on
emerging technology for NLN 's *Nursing
Educational Perspectives* journal. Dr.

Skiba advises the United States Congress and Health
and Human Services Department as a member of the
National Advisory Council on Nurse Education and
Practice (NACNEP). She is a coordinator for two
HRSA technology and informatics grants focusing on
informatics, telehealth, simulations and other emerging
educational technologies.

Emerging Technologies in Nursing Practice and E-learning

Given healthcare reform and the *Future of Nursing
Report*, how can emerging technologies facilitate the
preparation of nurses? This presentation, built on
highlights from the *Future of Nursing Report* and
healthcare innovations, will describe emerging
technologies over the next two to four years. These
technologies will help transform nursing education and
practice.

Badrul H. Khan, PhD

President and founder of McWeadon
Education, a world-renowned educator,
author, speaker and consultant in the
field of e-learning and distance learning.
He has authored and coauthored 11
books/manuals and over 100 papers. He
has delivered keynote speeches at more

than 50 international e-learning and distance learning
conferences. Dr. Badrul H. Khan is a leading expert in
e-learning and blended-learning design and
Implementation.

International and Cultural Perspectives in E-learning

E-learning is constantly contributing to globalization of
education. Thus, e-learning is global, and it is here to stay.
Designing e-learning for global participants is challenging.
*What does it take to create a meaningful learning
environment for diverse learners worldwide?* In this
presentation, issues of international and cross-cultural
perspectives of e-learning will be discussed in the light of a
Global E-learning Framework.

**Patricia Flatley Brennan, PhD, MSN,
RN**

Professor in the Departments of
Biostatistics and Medical Informatics,
Nursing, and Industrial and Systems
Engineering at the University of
Wisconsin-Madison. Dr. Brennan is the
Principal Investigator for the HRSA grant:

Wisconsin Technology Enhanced Collaborative Nursing
Education (WI TECNE) and leads the project to improve
the integration of informatics and telehealth into nursing
curricula. She is the National Program Director for the
Project HealthDesign and theme leader of the Living
Environments Laboratory at the Wisconsin Institutes for
Discovery.

Reflections and Sustainability of Technology Enhanced Nursing Education

Explore the technical infrastructure, financial resources,
and faculty and administrative commitments necessary to
leverage the initial WI TECNE investments. We will
promote sustainability of the advances made in this
program and evaluate whether the program truly
accomplished its goals of improving patient safety and
enhancing care efficiency.
