Campaign Platform – What campus Issues do you plan to focus on during your administration?

Our main goal will be to develop student leadership within housing in order to encourage stronger leaders on campus. Some issues that we would like to address would be getting more people involved in RHAA which would in return spread the word about our organization. We would also like to create academic programs and work better with other organizations.

One Sentence Public Statement:

Between the two of us we have six years of experience in RHAA and therefore feel that we are the most qualified for these positions.
