POLICY

Purchasing has the sole authority and responsibility for disposal of surplus and abandoned property at UW-Green Bay (other than titled and licensed vehicles, which are handled by the Department of Administration in cooperation with our campus fleet office). Purchasing is responsible for the timely disposal of surplus property at a fair market value for the benefit of UW-Green Bay.

UW-System campuses and other state agencies have the first opportunity to obtain items prior to any public sale. Material that is classified as surplus property must remain in the warehouse for 30 days before being offered for sale to the general public. After those 30 days, governmental and state agencies still maintain the option to obtain items in surplus property before the public sale is held. Local State agencies may arrange for delivery of large equipment or purchases, for a fee at time of purchase.

University departments are NOT authorized to trade in or dispose of State property to persons or organizations outside UW-Green Bay without obtaining prior approval from Purchasing.

For information on the disposal of hazardous materials or animals (live or dead), please contact Risk Management at X2273.

PROCEDURE

Trade-In:
Departments wishing to include a trade-in along with a purchase must notify Purchasing of this intent. Purchasing is required to perform a cost analysis to determine the best value for the State of Wisconsin. The information on the Surplus Property Declaration Form will be required, so it is advisable for departments to complete this form prior to contacting Purchasing.

Disposal of Surplus Property:

Complete the Surplus Property Declaration Form. Contact Dennis Nellis at X2215 to schedule a time to pick up the item that will be surplused.

In most cases, Surplus Property will determine the value of item to be sold. In the case of specialized equipment, Surplus Property staff may consult with
department personnel for assistance in determining pricing. State law requires all proceeds from surplus sales to be deposited in the State Stabilization Fund.

Items that are not owned by the State or UW-Green Bay, that are left on UW-Green Bay property (abandoned property), may be disposed of by Central Receiving using normal surplus methods, provided proper attempts to notify the owner have been made.

**Public Sales**

All surplus property sales are conducted at the UW-Green Bay, Facilities Management Building, 2420 Nicolet Drive, Green Bay, Wisconsin. Surplus property sold by UW-Green Bay is sold, as is, without warranty, payment on delivery, FOB our warehouse. All sales are final.

Public sales are scheduled the third Thursday of most months. Check the website for the current schedule and for a list of surplus items for sale.

Personal computers are sold without installed operating systems or applications software, due to software license restrictions. All personal computers offered for sale are tested and in operating condition when sold.

Customer purchases that are not removed from UW-Green Bay at the time of purchase must be removed no later than 3:00 PM of the following day. Items that are not picked up by 3:00 PM of the following day will be resold. No refunds or credits will be given for items that are not picked up.
