

Biology | 2014-2015 Assessment Plan

1. Which outcome will you assess?
 - Biology Learning Outcome 2: demonstrate an understanding of genetic information, hereditary processes, and their relevance to evolutionary change as a product of mutation and natural selection
2. Which technique will you use to assess this outcome?
 - Embedded assessment in the courses listed below.
3. Which course or group of students will you assess on the outcome chosen above and when?
 - Students enrolled in the upper level core courses Biology 303 (Genetics), Biology 309 (Evolutionary Biology), and Environmental Science 302 (Principles of Ecology) will be assessed.
4. Who will do the assessment and coordinate the data collection and reporting?
 - Course instructors (Pott, Meinhardt and Wolf) will conduct assessments. Amy Wolf, Biology Chair, will compile results from assessments and report the findings.
