

## Environmental Science | 2014-2015 Assessment Plan

1. Which outcome will you assess?
  - Env Sci Outcome 5: Demonstrate competency in collecting, managing, evaluating, interpreting, and communicating information through hands-on research.
2. Which technique will you use to assess this outcome?
  - Students in this course are required to collect original field data, enter and manage these data, statistically analyze results and interpret the statistical outcome. Work is summarized and written up in lab reports and one project is presented orally at the end of the semester. ENV SCI Student Learning Outcome 5 will be evaluated using grades from relevant assignments as well as an embedded assessment administered at the beginning of the semester and again at the end of the semester.
3. Which course or group of students will you assess on the outcome chosen above and when?
  - Students enrolled in Principles of Ecology ENV SCI 302 will be assessed during the spring 2015.
4. Who will do the assessment and coordinate the data collection and reporting?
  - Dr. Amy Wolf is the instructor of Principles of Ecology ENV SCI 302 and will conduct the assessment and report the findings.
