

Theatre | 2013-2014 Assessment Plan

1. Which outcome will you assess?

Graduating Majors will be qualified for entry-level work in educational, community and professional theatrical endeavors. Majors will be qualified for entry into Graduate Study in Theatre

2. Which technique will you use to assess this outcome?

Senior exit interviews have supplied us with student plans upon graduation. Contact with graduates is frequently achieved by email. Students may request letters of recommendation for graduate school or jobs.

3. Which course or group of students will you assess on the outcome chosen above and when?

We have chosen to collect data on current upperclassmen and alums who have remained in contact over the past 10 years. While technical theatre majors are more likely to have jobs in their area of study upon graduation, we believe that 5 years of professional development for performance students gives more significant results in career development and the decision to pursue graduate studies. We expect to have a sample of approximately 50 current students and alums with documentable achievements.
