MEMO

DATE:  28 March 2017

TO:  Administrative Council

FROM:  Gregory Davis, Provost and Vice Chancellor for Academic Affairs

SUBJECT:  Academic Performance Solutions (APS) Implementation

In order to improve our understanding of campus operations, in fall 2017 we adopted a software platform offered through the Education Advisory Board (EAB) called Academic Performance Solutions (APS). Upon implementation, APS will provide our campus with real-time dash boarding of academic metrics, revenues, and expenses at the program, department, and college level. Importantly, APS also provides validated benchmarking by which we can evaluate our campus performance relative to that of our peers. Academic Performance Solutions will empower all University employees with the information needed to shape strategic decisions, in large part by standardizing data calculation methods and equalizing access to important campus metrics in real time. Implementation of APS requires changes in several of our data reporting methods. The attached memo identifies the steps for implementation of the APS platform at UW-Green Bay and tasks the Academic Deans to implement these reporting changes, including Task Schedules and required Timelines.
