

Social Skills Lab - Mac Hall 133

Interactive Display Tutorial

1

In Room B in the Social Skills Lab, there is an Interactive Display that has a Windows Computer Attached, making it giant “touch screen computer” This display is labeled with “SmartBoard”, but most people will utilize the “interactive Display/Touchscreen Computer Features”. To Utilize the Display, several steps need to be completed.

2

The Power Supply for the “Interactive Display” is located behind the display here

The “Mini-Computer” for the “Interactive Display” is located behind the display here

3

Wireless Keyboard - Retrieve it for use (may also be on base of cart)

Mini-Computer Location

Display Power Supply

Wireless Mouse - Retrieve it for use

4

Press the Power Button to turn on the computer

Press the Toggle Switch to turn on the Interactive Display

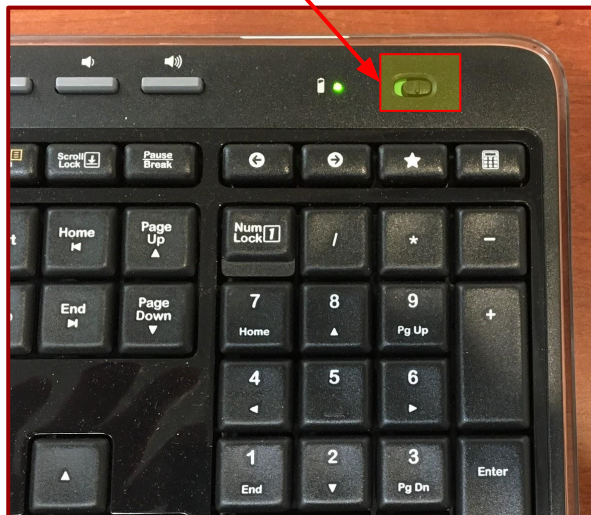

5

The Interactive Display will power up as well as the computer. Switch the Wireless Mouse on

6

Switch the Wireless Keyboard on

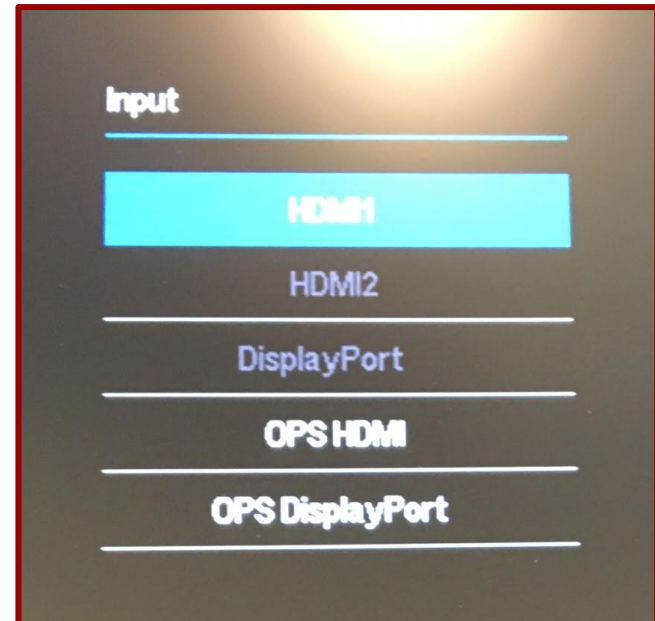

7

The "Source/Input" needs to be changed to "HDMI 1" so the Computer's signal is connected to the Interactive Display. Locate the controls on the Lower Left side of the Display.

8

Press the "Source" button several times slowly, until "HDMI 1" is highlighted. Wait several seconds and the "Windows Desktop will appear

After the Windows Desktop shows up on the Interactive Display, use the “Wireless Keyboard” to Log In using your UW-Green Bay Login Credentials. After you log in, you will have all of the same resources that your office computer has. You can use the Wireless Keyboard and mouse, but the real power is the “touch screen” capability. You can use your fingers and the Red or Black Stylus that is magnetically attached to the display. There is also a “WebCam” placed on TOP of the display. You can use Skype, Google Hangouts, etc. to **create** or **join** an online Audio/Video Session

**When Finished with the Interactive Display, do the following:**

- Shut down the computer using the Start Menu Icon
- Turn off the Power Supply to the Display (located behind the display)
- Power Off the Mouse and Keyboard and return to their location behind the display or on the cart.
