Dear UWGB Student, faculty/staff, or Kress Member,

Thank you for your interest in our personal training program! Before getting started, please complete the following forms to help us place you with the trainer best suited to help you meet your fitness goals.

Once you have read and completed the enclosed documents, please return the packet to the UREC front desk. After we have reviewed your applications, and are able to place you with a trainer, you will receive an email connecting you with your trainer.

More information on package prices and the personal training program in general can be found on the additional handouts provided or online at uwgb.edu/urec. If you have any questions, please don't hesitate to ask! Again, thank you for choosing our program. I look forward to getting you set up and working towards your goals!

Thank you,

Alex Reichenberger

Par-Q & You

(A Questionnaire for People Aged 15 to 69)

Regular physical activity is fun and healthy, and increasingly more people are starting to become more active every day. Being more active is very safe for most people. However, some people should check with their doctor before they start becoming much more physically active.

If you are planning to become much more physically active than you are now, start by answering the seven questions in the box below. If you are between the ages of 15 and 69, the Par-Q will tell you if you should check with your doctor before you start. If you are over 69 years of age, and you are not used to being very active, check with your doctor.

Common sense is your best guide when you answer these questions. Please read the questions carefully and answer each one honestly: check YES or NO.

If you answered NO honestly to all Par-Q questions, you can be reasonably sure that you can:

- start becoming much more physically active — begin slowly and build up gradually. This is the safest and easiest way to go.
- take part in a fitness appraisal — this is an excellent way to determine your basic fitness so that you can plan the best way for you to live actively. It is also highly recommended that you have your blood pressure evaluated. If your reading is over 144/94, talk with your doctor before you start becoming much more physically active.

If you answered YES to one or more questions, delay becoming much more active:

- if you are not feeling well because of a temporary illness such as a cold or a fever — wait until you feel better; or
- if you are or may be pregnant — talk to your doctor before you start becoming more active.

Please note: If your health changes so that you then answer YES to any of the above questions, tell your fitness or health professional. Ask whether you should change your physical activity plan.

Informed use of the Par-Q: The Canadian Society for Exercise Physiology, Health Canada, and their agents assume no liability for persons who undertake physical activity, and if in doubt after completing this questionnaire, consult your doctor prior to physical activity.

No changes permitted. You are encouraged to photocopy the Par-Q but only if you use the entire form.

I have read, understood and completed this questionnaire. Any questions I had were answered to my full satisfaction.

Name ________________________________

Signature ________________________________ Date ________________________________

Signature of Parent ________________________________ Witness ________________________________

Note: This physical activity clearance is valid for a maximum of 12 months from the date it is completed and becomes invalid if your condition changes so that you would answer YES to any of the seven questions.
