Resolution in support of the addition of electronic cigarettes to the University Smoking Policy

Whereas: The Student Government Association deems it necessary to take action on the use of electronic cigarettes in response to student complaints being reported by university officials.

Whereas: The use of electronic cigarettes is a device that dispenses water vapor, the reports have indicated a distracting odor that is affecting the learning environment of the university.

Whereas: The electronic cigarette device is capable of storing THC products and other serious drugs

Whereas: The appearance and the function of the electronic cigarettes resemble that of a cigarette, the Student Government Association feels that they shall apply to the university policy in full.

Therefore: Be it resolved that the Student Government association, in action of student complaints and university health and safety, recommends the addition of electronic cigarettes to the current university smoking compliance.
