Resolution in support of establishing a sustainable living residence hall within campus housing by Fall of 2012.

Whereas: The University of Wisconsin—Green Bay (UWGB) owns the rights to the Eco-U brand name.

Whereas: The Student Government Association (SGA) has noticed that many students do not believe that our campus does enough to live up to this name.

Whereas: SGA has pinpointed campus housing as an area that could do more to promote the sustainability mission of UWGB

Whereas: SGA has reviewed the work of the Fall 2011 capstone course, and a sustainable living residence hall represents a cost effective measure to promote environmental sustainability on campus.

Whereas: A sustainable residence hall will be a highly visible display of our commitment to sustainability, and promote energy and water efficiency within campus housing.

Whereas: The development of a sustainable residence hall could be accomplished through a restructuring effort of one residence hall, with the inclusion of an RA or volunteer as an environmental coordinator, with little upfront costs.

Therefore: Be it resolved that the students of UW – Green Bay support the implementation of a sustainable living residence hall by the Fall of 2012.
