University of Wisconsin – Green Bay

Mechanical Engineering

Program Educational Objectives

Approximately five years after earning the B.S. in Mechanical Engineering, it is expected that graduates will;

(1) Be employed as a mechanical engineer and perform all functions assigned to a mechanical engineer including completing engineering designs and other applications using both practical and theoretical knowledge characterized by their interdisciplinary strengths;

2) Function effectively both as a leader and as a member of project teams, demonstrating effective communication skills and ethical behavior;

(3) Achieve positions of increased responsibility within an organization and practice continued education through advanced degree or certificate programs or participation in continuing education in engineering or related professional fields;

(4) Adapt to changing industrial and technological advancements and be committed to continuous improvement.
