GEOSCI 102 – Natural Hazards

This course transfers to nearly all public and private colleges and universities, both in-state and out-of-state.

- **Transferology** is a tool used by colleges and universities that allows students to see how courses transfer between institutions. If students are interested transferring credits to a school outside the UW System, this might be a useful tool to give an idea of the transferability.

- **TIS** (Transfer Information System) is a tool used by the **UW System** to show how courses transfer between schools. We have summarized the information for this course from TIS:

<table>
