#### 5. Human Resources Report

Melissa Nash, guest speaker, joined at 2:00. She first discussed the 2022-2023 climate survey after a pandemic-related delay. "The Higher Education Research Institute" Survey model was chosen (same as student climate survey from 2021-2022 year). The benefit of this model is customizable options for both faculty and staff. The ability to add specific questions also allows

for participants to code and report-out by campus, academic, non-academic etc. The survey is anonymous and entirely voluntary. Schedule runs fall through April; Melissa proposed timeline for development, data collection, and analysis. Report data be expected available in July of 2023.
