**String Art**

Show us your finished projects on social media with the #uucrafts!

**Supplies:**
- Colored String or Yarn
- Scissors
- Wood Board
- Nails

**Step 1**
Start with hammering nails into your board to outline your design or use the pre-nailed board. Then gather string to go with your design and have some scissors nearby.

**Step 2**
When beginning a letter or the start of a design, tie a knot onto one nail, and then go around the perimeter of the letter or the design with the string. Loop your string around each nail before moving to the next to keep the string in place. Be sure to pull tight.

**Step 3**
Go back and forth between nails, wrapping around the nail tightly to secure the string, until you’ve covered most of the board underneath. You can also go around the perimeter again once you’ve gone back and forth enough, to give it a more polished look. When this is complete, cut the string from the ball and leave about 3 inches to tie a knot. Tie a knot or two around your last nail to secure the string and then cut off most of the excess string. Hide the tail within the design.

**Step 4**
Repeat steps 2 and 3 until your whole design is complete!
