

Arctic primrose in full bloom

Roy Lukes photo

The Toft Family sold their property to the Nature Conservancy in 1967 and wished to have the land preserved for all wildlife and native plants to live in peace.

The South Point addition was purchased in 1976 to be added to the original tract. The total land area of the Toft Point State Natural Area is 743 acres. It is owned by The University of Wisconsin.

Mission Statement of the Friends of Toft Point, Inc.

To support the Management Plan of the Cofrin Center for Biodiversity at the University of Wisconsin, Green Bay, to help preserve the flora and fauna of Toft Point and to help educate visitors about the natural history and the Toft family history of this State Natural Area and National Natural Landmark.
