Have you ever looked closely at a Wisconsin map and wondered about those “little” islands at the top? The Apostle Islands National Lakeshore (AINL) is a true Wisconsin gem and one of the most beautiful places to explore in the Upper Midwest. Because only parts of the AINL are accessible by car, it takes extra effort to see it all. But visiting is an enriching experience you’ll never forget. In this class we’ll discuss the area’s natural and human history and see the many ways you can experience the spectacular “Jewels of Lake Superior” from ice caves in winter to scenic boat tours, kayaking, and hiking. Your guide is Ken Braband, avid traveler, hiker, camper and sea kayaker.

42 The Erratic Path to Polio Eradication (N)**Location:** Green Bay**Classroom:** Green Bay Campus RH 220**Presenter:** Julia Wallace, PhD**Coordinator/Moderator:** Jim Hinckley**Dates:** 2/27**Time:** 10 a.m.-12 p.m.**Limit:** 50

The poliomyelitis virus has probably been around since the beginning of human civilization, but it wasn't until the 20th century, when sporadic outbreaks of the crippling disease emerged, and a US president was afflicted, that medical science started doing something about it. The path to finding a polio vaccine was rocky and did not always employ good science. We will review the many lessons and medical gains that were made, not all related to polio. The infrastructure built to eradicate polio, however, will continue to benefit broader public health efforts. And while the global end to this disease is close at hand, it is not a given. As long as one child remains infected, children in all countries are at risk.

56 Taxonomy: Reconstructing the Tree of Life (R)

Location: Green Bay
Classroom: Green Bay Campus Room TBD
Presenter: Michael L. Draney
Coordinator/Moderator: Karen Dallman
Dates: 4/16
Time: 10 a.m.-12 p.m.
Limit: 125

One of the most profound discoveries of Biology is the Tree of Life, which is the realization that all organisms on Earth are genetically related to each other. This has profound implications, one of which is that we can know a lot about an organism if we know which other organisms it is related to. But how can we know? This is the work of taxonomists and systematists, who use a variety of sources of evidence (fossils, organism traits, and inherited molecules) to try to reconstruct the great Tree of Life. This is very difficult to do, for reasons we will talk about. This presentation is intended to be an interesting introduction to the topic and no prior scientific background is needed.

57 Evolution of Hospitals and Nursing Care During the Civil War (N)

Location: Green Bay
Classroom: Green Bay Campus RH 220
Presenter: Gordon Dammann
Coordinator/Moderator: Ellen Framness
Dates: 4/16
Time: 1-3 p.m.
Limit: 50

Evolution of hospitals and nursing care during the American Civil War evolved between 1861 to 1865. Neither of these existed and the number of sick and casualties at this time created a new era of medicine and care.

58 Code Girls (N)

Location: Green Bay
Classroom: Christie Theater
Presenter: Bob Cook
Coordinator/Moderator: Kathy Bergner
Dates: 4/23
Time: 10 a.m.-12 p.m.
Limit: 150

No one likes to send critical war information in the clear, i.e. without encryption. So everyone devised codes to protect that information. Of course, if they encrypted it we needed to decrypt it so we would know what they were going to do. During WWII many young women on both sides of the "pond" worked diligently to do just that. We will look at the Bletchley Girls and our own women code breakers and examine how their work helped secure the eventual Allied victory.

59 Adapt or Die (N)

Presenter: Michael L. Draney
Coordinator/Moderator: Karen Dallman
Dates: 5/16 5/23
Time: 9:30 a.m.-12 p.m.
Limit: 24

Running is great exercise, but many older people can no longer tolerate the wear and tear that it entails. Walking is a fine alternative, but it lacks the intensity that leads to higher cardiovascular fitness. Consider race walking, which combines the advantages of both! By adding some race walking techniques to your walking exercise, you can go faster, engage more of your body and increase your flexibility and mobility, all while keeping the low-impact and low-injury nature of walking. All fitness levels welcome, as long as you have doctor's clearance to walk 1 mile. Come to class with comfortable walking attire, and bring a bottle of water for your personal use.
