VI. Old Business (continued)
   A. Visitation Policy Discussion
      a. Haevers: Is this for a specific sort of building?
         a. President: A guest will not depend on where you are.
b. 3334: Can we open that up?
      a. We are just defining a guest as of right now. We will open that up for later.
c. What defines a guest
      a. Res Hall-yield to Erin: Defining a guest should be someone who is not a student to the University.
         a. President: If they are a student and they aren’t registered, they don’t know that they are in there.
b. Res Hall RA: Staff said that if there is a problem, they don’t know when the guests are in there, so they don’t know to tell the firefighters. They wanted to know if the RAs would be notified if guests are in there.
c. 3334: Could emails be sent to the RAs notifying them?
      a. Gail: That would have to be manually done. That’s not something that couldn’t be developed but it is currently non-existent
d. 3334: Guest is someone who lives out of building
e. NRHH: Anyone who lives outside of building so that we know that they are in there.
f. Roy 1: Anyone who doesn’t live in the hall should be a guest.
g. Phase 3: Anybody who doesn’t live in that room. It would hold those people accountable.

h. Apt. RA: Agreed that anybody who doesn’t live on campus should be registered.

i. Haevers: Someone who doesn’t live on campus and isn’t a student, they should be registered. Students who live on campus they should register if they are going to spend the night in a different location or different building. Just so the RAs know.

j. Res Hall RA: Just add to Haevers, I think that it’s a good idea to keep track of people. Keep in mind that people off campus apartments wouldn’t have to register. We don’t want to treat them like a little kid, it might make them move off campus.

k. Poll
   a. Doesn’t live in room: 0
   b. Doesn’t live in Hall: 11
   c. Doesn’t live on campus: 2
   d. Guest is someone who doesn’t live in that hall, on campus, or isn’t a student.

d. Number of Guests
   a. Residence Halls
      a. Res Hall RA: Should not put this in the policy because it should be in the roommate agreement and we should focus on that.
      b. Haevers: Should be two
      c. Roy 1: What’s the policy now?
         a. There is no limit
      d. Phase 3: Should meet fire code. But also go off of the roommate agreement.
   e. Phase 2: They don’t want a limit as long as they are following the rules.
   f. Apart. RA: Follow the roommate agreement. Specify in the roommate agreement that it is overnight and not day time.
   g. 3334: Would we want to put it as “limited by roommate agreement but not exceed fire code”
   h. Poll: Doesn’t exceed Fire code, Specify the differences between visitor and guest in roommate policy, and let the roommate policy distinguish how many guests are allowed.

e. Limitation
   a. Consecutive days per week or month
      a. 3334: Should be limited per month because if someone is coming to visit you for spring break.
      b. Res Hall: Before we decide on number of days, should we consult with public safety for number of days.
         a. Gail: what we decide, we will share with public safety.
      c. Phase 3: We really didn’t want to constrict people so they would stay on campus. 3 days, per week, per guest.
d. 3334-Yeild to Hayden: If you are putting limit, shouldn’t have limit if they are living on residence life. They are paying but they are just switching room. Different for off campus guests
   a. What if your roommate didn’t want to have that person there all the time?

e. Phase 1: 3 days a week is enough if someone wants to stay the weekend.

f. Haervers: 3 days a week is fine but worried about the certain time they are visiting. If they spend the week during finals week, it can be disturbing
   a. POI: we decided we didn’t want different policies for finals week.

g. 3334: 3 day a week policy, could you apply for exception?
   a. We discussed that exceptions could be made by office of residence life.

h. Res Hall-Yield to Erin: Idea of being in the roommate agreement, but also limit if they aren’t a resident and are bouncing around housing we would be able to stop them somehow.

i. Annmarie: Concerning Ted, would there need to be a limit because they don’t have a roommate. As long as the guest is an on campus student.

j. Schaefer: Ted, easily resolved the on campus worries. On campus, we pay so we shouldn’t have a limit if they pay.

k. Vote for two different policies: 11, 1, 0
   a. Two different policies
   b. No limit for on campus students: 11, 2, 0
   c. People who don’t live on campus
      a. Haervers: Could there be another exception: Number of days per semester? Have visitation policy to match parking policy.
      b. NRHH-POC: If we were to vote for consecutive days, stay the same as now?
         i. Unless we want to change it, yes.
      c. POC-Schaefer: Voting to be a limit on each? Or what one is the best?
   d. Vote on Consecutive Days: 11, 1, 0
   e. Per week, per month, or per semester:
      i. Per week: 6
      ii. Per Month: 6
      iii. Per Semester: 0
   iv. Discussion:
   v. Schaefer: Per month so we can have people stay on campus, they could take advantage of that.
   vi. NRHH: One policy is that they limit it to two consecutive per week. If you were to limit it to week, it will come out to 12 days an entire month without paying.
   vii. Vote: 1, 11
