Nursing

Areas of strength noted in the Nursing Program review were its extensive monitoring and quality improvement efforts regarding structure, processes and learning outcomes as part of its Commission on Collegiate Nursing Education accreditation requirements; marketing and intensive advising that has resulted in an increase in enrollment; utilization of ethical business practices in its self-funded BSN-LINC online track; and effective collaboration with other UW System institutions. The Program was urged to continue its program improvement efforts and expand its enrollment through the establishment of off-site locations and continuation of its marketing efforts. Continuation of the program was recommended at all levels of review.
